

Renotronics

RT-19N

Optical Fiber Identifier

Features

- The most small fiber identifier ever!
- No need cut down the fiber connection.
- Show optical signal direction, power and frequency.
- Suitable for 0.9, 2.0 and 3.0 fiber cables.
- Test sensitivity from -40dBm to +10dBm.
- Build in Bluetooth, support remote control.

SPECIFICATIONS

Model	RT-19N
Wavelength	800nm ~ 1700nm
Detector	Φ1mm InGaAs 2 pcs
Application Fiber	Φ0.9mm, Φ2.0mm, Φ3.0mm
Modulation Frequency	CW, 270Hz, 1KHz, 2KHz
Frequency Detection Range	≥ -20dBm
Signal Direction Indication	two direction LED light
Signal Detection Range	-40 dBm ~ +10 dBm
Insertion Loss	≤ 1dB
Battery	3.7V 500mAh Li Battery
Battery Life	Approximate 24H
Working Temperature	-10° C ~ +50° C
Storage Temperature	-40° C ~ +70° C
Dimension	82 x 43 x29 mm
