

WISI VS 35 PRO

Programmable filter amplifier

Description

The VS 35 PRO is a programmable terrestrial filter with an integrated amplifier. Four antennas (1x FM, 1x DAB/VHF, 2x UHF) can be connected via four F-connectors. 15 freely selectable channels can be programmed - a number that may be increased up to 50 by extending the channel bandwidth. The high selectivity ensures a high signal quality of the converted channels. All settings are done by the control unit OH 41 (not included in the delivery scope). The LTE 700 / LTE 800 MHz protection is done automatically by the device itself. Moreover, the received terrestrial channels can be relocated to any required frequency, hence the VS 35 PRO is usable as a channel converter.

At a glance:

- Filters and amplifies 15 terrestrial channels (number can be increased up to 50 by extending the channel bandwidth)
- Completely free assignment of the filters to the desired input
- Very high selectivity of the filters (>50 dB to adjacent channels)
- Integrated AGC (Automatic Gain Control) to compensate level differences at the input
- Level indication of the received channels
