

WISI GT OS2

Software option for DVB-S/S2/S2X tuner extension

Description

GTOS2 enables additional 8 DVB-S/S2/S2X tuners in GT34. The GT 34 module allows you to receive up to 16 DVB-S/S2/S2X satellite transponders and convert the streams to IP multicast or unicast transport streams.

At a glance:

- DVB-S/S2/S2X – IP gateway for IPTV, CATV and multiscreen solutions
- Reception of up to 16x DVB-S/S2/S2X satellite transponders via 4 RF-inputs
- For saving cabling costs integrated SAT multiswitch
- Professional DVB transport stream processing
- SPTS and MPTS streaming (CBR or VBR)
- UDP and RTP MPEG transport stream over IP protocol
- High-density reception of 96 transponders in 1 RU
