

WISI GT DOL

Software option for Dolby Digital audio decoding

Description

The TANGRAM Dolby decoding is enabled by the SW option GTDOL. The Dolby decoding allows reception of Dolby audio sound and decoding to support the different audio output formats for analogue (PAL and SECAM) modulation. The GTDOL software option requires a Dolby enabled TANGRAM HW. The WISI TANGRAM video platform is a high-density TV headend for contribution of digital TV via IP networks and end-to-end IPTV solutions such as video-on-demand, connected TV and OTT (Over The Top) or Web TV.

Scope of delivery

- After buying the software option you can download the entitlement file which includes the software option on www.wisiconnect.tv.

At a glance:

- Decoding of up to 6 dolby audio inputs in one TANGRAM GT21W
- Allows audio output in analogue modulation in mono, nicam stereo and A2 stereo
- Note: Requires dolby enabled TANGRAM HW
