

WISI GNNRED

Software option for N+1, 1+1 module redundancy

Description

The N+1 module redundancy for GN50W0230 or GN50W0110 chassis is enabled by the SW option GNRED. The N+1 redundancy provides the functionality to set up redundancy group, and assigning CHAMELEON modules as a „master“ or „reserve“ or „none“ for a group. The „reserve“ CHAMELEON in a redundancy group is kept „offline“ until it needs to be used due to a failure in an operational CHAMELEON.

Scope of delivery

- After buying the software option you can download the entitlement file which includes the software option on www.wisiconnect.tv.

At a glance:

- N+1 Redundancy and 1+1 Redundancy
- Support up to 5 redundancy groups
- Status information UI
- Automatic Failover
- Easy storing of configurations files for all operational CHAMELEON modules
